

Cloud Chamber (Cold Plate Type)

Description:

This safe and affordable Cloud Chamber requires no dry ice or liquid nitrogen. Instead, the apparatus uses a specially designed cold plate that is capable of retaining a low temperature for about one hour by freezing the plate in a standard freezer. Tracks of radiation can be observed for about 20 minutes (until ethanol is vaporized) in a room at 25°C (77°F).

The cold plate can be used repeatedly by freezing it again. The only consumables required to observe radiation tracks are ethanol (99.5%) and hot water (~50°C). Detailed Instruction Guide included.

Bee Spi V

Easy to use photogate by Narika Products. Operation: 2 x AAA batteries (not included) this item is a BEST SELLER ! Use this handy photogate to measure free fall speeds, cars and projectile velocities. Two parallel photogates detect, measure and display speeds of any objects that pass through from zero to 99.99 km/h. Also measures in m/s.

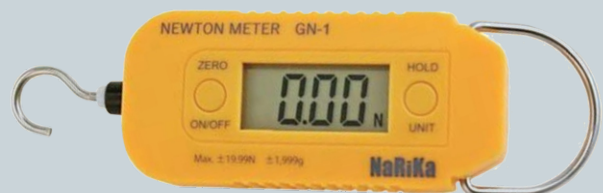

Technos NEWS updates:

We are now stocked with 150x150mm wire gauze mats with ceramic centre.
125x125mm size will be back in stock late September.
These are certified asbestos free.

Newton's Meters

Description:

A sensor that can be used to digitally display force values. The value of force can be measured more easily than conventional spring scales. In addition, since it supports both push and pull, it can be used for various experiments.
