

Metals Kit

Identification

LB2100-001 Set of 8 Metal Rods

Description:

The IEC Metals Kit is a small pack of 8 different metals in the form of rods 3mm diameter x 50mm long. Each rod is marked at one end with the initial of its name. The names of the different metals are marked on the cardboard pack.

The metals are: Brass, Copper, Lead, Aluminium, Iron, Nickel, Tin and Titanium.

The convenient plastic vial allows the metals to be compared one to the others and the sample bars can be removed and handled to feel the differences in strength, weight and hardness.

Diameter: 55mm	Height: 82mm	Weight: 54g
