

# Distribution Board

**LB1710-002**

## Description:

The IEC Distribution Board is a small housing that can be connected to a power source and which provides 5x pairs of 4mm spin-free IEC red and black terminals for the connection of several different projects.

**Note:** Using terminals is more expensive than using sockets, but terminals can accept wire connections as well as banana plugs and are therefore more useful in the classroom.

## IEC has a large range of:

- 4mm spin-free terminals and 4mm sockets
- Coloured cables with moulded stackable 4mm banana plugs
- Coloured cables with moulded stackable 2mm banana plugs
- Pairs of red/black cables in clear sleeves with 4mm moulded stackable banana plugs.
