

PENDULUM BOBS - all types

MF2291-001, MF2292, MF2293, MF2294, MF2295 pendulum bobs

DESCRIPTION:

The IEC **Pendulum Bobs** are as follows:

MF2291-001 Brass pendulum bob, 25mm diameter

MF2292-001 Brass pendulum bob, 20mm diameter

MF2293-001 Brass pendulum bob, 12.5mm diameter

MF2294-001 Steel pendulum bob, 20mm diameter

MF2295-001 Plastic pendulum bob, approx. 20mm diameter

These diameters are nominal only and, if experiments involving mass are performed, the actual diameter of each bob should be measured accurately. Each bob has a 1.5mm diameter hole drilled right through the diameter with one side counterbored so that a knot in a cord can be pulled into the hole to hold firmly and also be out of sight.

MF2291, MF2292, MF2293, MF2294, MF2295

Designed and manufactured in Australia
